

Exchange Programs

Series 252 Servovalves

Powerful advantages

- » Good-as-new servovalve performance
- » Significantly lower replacement cost
- » Next-business-day delivery (Monday through Friday)
- » 12-month warranty
- » Stringent remanufacturing specifications
- » Convenient return carton and label

Fast, high-quality replacement

Servovalve performance is critical to the efficiency of your lab and the quality of your test results. With proper care, servovalves can last for several years. Eventually, however, normal wear will affect performance. As servovalves approach end of life, test professionals need a fast, convenient and cost-effective way to replace them. To help ensure rapid, high-quality replacement, MTS offers a streamlined exchange program for MTS Series 252 Servovalves.

This simple program makes it easy to acquire a remanufactured, tested and fully warranted replacement servovalve in exchange for a used valve core. The MTS Servovalve Exchange Program provides

next-business-day delivery for a like-new servovalve, enabling you to restore test system performance and regain productivity quickly, at a more affordable price.

Lab and facility managers can use the MTS Servovalve Exchange Program to take a proactive approach to maintaining the reliability of test equipment and the availability of the lab. MTS can help you create a replacement plan that reduces the risk of unscheduled downtime and aligns with your test schedule to minimize interruption. This planned approach not only allows labs to operate with confidence, it allows managers to make room in the budget for servovalve replacement and minimizes the potential for costly surprises.

be certain.

Fast, convenient process

Exchanging a servovalve through this program is simple, fast and easy. We supply a return carton and label with the replacement valve. Just place your used valve core in the carton, apply the label and return it within 30 days of your order to receive full credit.

Stringent quality standards

Exchange servovalves are remanufactured according to stringent MTS standards. These specifications incorporate the latest product revision levels where applicable. As a result, you can expect good-as-new servovalve performance for much less than the cost of a new servovalve.

Compatibility and exceptions

MTS can help determine the compatibility required for servovalve exchange, as well as make sure a functional replacement is the best solution. However, some products/exchanges are not supported. Please check with your MTS representative for more details about exceptions.

Preventing premature wear

If servovalves are wearing faster than expected, you may want to consider one of the Fluid Assessment options from MTS. The monitoring of hydraulic fluid contaminants and chemical composition can provide the information needed to determine the causes of premature wear or failure.

Complete service solutions

In addition to designing innovative test equipment, MTS offers a full complement of service solutions. Every day, we collaborate with customers to solve a wide range of testing and lab operation challenges through high-quality service and support.

After decades of experience creating service solutions for all kinds of customers in many different industries worldwide, MTS understands the best practices that are essential to successful testing. We have also gained unique insight into how lab priorities are shifting in light of smaller budgets, faster product development cycles, and corresponding pressures to reduce cost and save time.

Test operations can be unpredictable, so managing them will require some amount of reaction to unexpected circumstances. But a purely reactive approach does not work well when lab schedules become increasingly shorter, tighter and less flexible. To keep product development on track, the most successful labs are implementing proactive strategies to minimize unplanned downtime.

Exchange programs are one part of this approach. MTS also offers a wide range of service solutions designed to help you maximize testing effectiveness. We look at your equipment, your lab and your test program to see where we can add value and help meet specific objectives. Contact us today to optimize your testing operations with MTS service solutions.
