

Registration

To register for an MTS training course, call the appropriate Regional Training Center.

- » Americas Training Center
1-952-937-4000
- » Asia Training Center
+82-31-714-7151
- » Europe Training Center
+49-30-81002-222

Training course schedules are available online at www.mts.com.

Confirmation

MTS will send you written confirmation of your course registration. Prices for standard courses include tuition, text materials, class supplies, and lunch. All other expenses are the responsibility of the student.

Cancellation policy

MTS reserves the right to cancel a class if there is not sufficient registration four weeks prior to the start date of the class. MTS will not reimburse any prearranged travel-related expenses if a class is cancelled.

If you cannot attend the course after you have registered, you must cancel your registration at least one week prior to the start of the course. Persons who do not attend a course and who do not cancel their reservations will be assessed a non-notification of cancellation fee.

Customized training

If you have specialized needs requiring custom training, MTS can help. MTS has a large staff of engineer trainers with a wide range of experience. In many cases, customized training may be combined with a solution to an issue you may be experiencing.

Please contact MTS for a quote for your custom training requirements.

Training at your facility can be more cost effective

If you have a large group needing training, consider the cost effectiveness of having MTS provide training at your facility.

MTS will deliver any course at your facility. Please see price list for base rates that include tuition, text materials, and all other classroom supplies for the students.

You are responsible for providing all hands-on training equipment, classroom facilities, and training aids such as projectors.

BENEFITS OF ONSITE TRAINING

- » More economical for groups of four or more.
- » Often provides answers to the specific questions facing your company.
- » By using your equipment for the hands-on training, the students learn exactly how to use their testing system configuration.
- » Scheduling flexibility can resolve shift work and other group logistics issues often associated with larger groups.
